Sayson

480i

for Sphericall

All the features you need in a business set designed for any Voice-over IP environment.

Sayson has developed the 480i—a versatile, feature-rich IP screenphone for use with the Sphericall system. The competitively priced 480i has all the features of a proprietary business set and more. Four call appearance buttons make juggling multiple calls easy; pickup another line and the current call is automatically placed on hold. You can view the status of other extensions with the enhanced busy lamp field. Power over Ethernet support eliminates the need for power supplies at the desk, allowing for secure centralized power.

Features

Plug-and-Play — Tightly integrated to work with the Sphericall phone system.

Enhanced BLF (Busy Lamp Field) — View a phone's status (onhook, offhook, ringing, connected) on the 480i's large eight-line backlit display, or view presence information (out to lunch, busy, DND and more).

Four Call Appearance Lights — Juggle up to four calls at the touch of a button. Place callers on hold automatically as you jump between calls.

Exceptional Audio — Quality speaker phone with excellent voice delivery. Intercom ability allows set paging within the office.

Protect Your Investment — Firmware upgrades can easily be installed in the field as standards develop and protocols evolve.

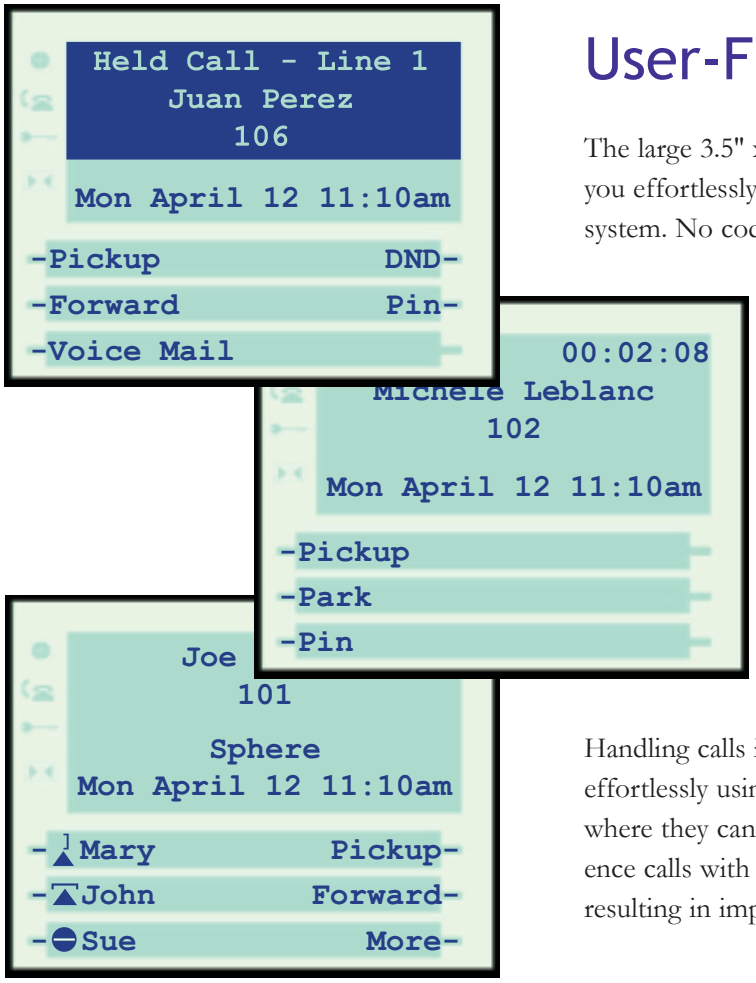
Less Wiring — Built-in two-port, 10/100 Ethernet switch lets you share a connection with your computer. Inline power support eliminates power adapters.

Enhanced Productivity

Maximize your productivity while minimizing training time with the 480i's easy-to-follow visual prompts. Instantly know whether someone is available to answer a call with the screen-based Busy Line Field icons. Juggle up to four calls with call appearance lights. Gain access to advanced telephone features at the touch of your fingertips, and manage your calls with confidence.

Quality Business Set

The 480i offers the durability and reliability found in the highest quality business telephones. Its sleek, ergonomic design and large screen makes this affordable telephone a smart addition to any business environment. The built-in speakerphone offers the highest sound quality, and intercom (set paging) is also available, connecting you and your peers quickly and accurately.



User-Friendly Screen Menus

The large 3.5" x 2.25" backlit display and six softkeys guides you effortlessly through the powerful features of the Sphericall system. No codes to memorize, no need to constantly refer back to manuals, just follow the screen menu visual prompts using the six softkeys.

The screen also displays information such as call status, phone status, call time and inbound call information. Busy Lamp Field softkeys allow you to monitor the status of up to five other extensions on your system at a glance with easy-to-read icons.

Handling calls is easy—transfer callers to another extension effortlessly using the visual prompts, park calls to virtual zones where they can be retrieved from any phone, and create conference calls with ease. Training time is greatly reduced, thus resulting in improved business productivity.

480i Technical Specifications

- 11.43 cm W x 17.78 cm L x 11.43 cm H
- 0.91 kg
- Supports IEEE 802.3af inline power. Optional universal wall adapter available, but not provided, for networks that do not supply power
